

## Outreach Programs

LiMSA is a non-profit organization dedicated to supporting schools in surrounding communities, particularly in subjects that are often considered challenging for learners. We work closely with schools that have lower matric pass rates, visiting them and offering **free, high-quality classes** aimed at improving understanding and boosting performance.

Our school outreach programs are about more than just academics — they are about **reaching beyond the classroom** to create meaningful opportunities, provide essential support, and build strong partnerships that help learners thrive academically, socially, and personally.

Through this initiative, we have seen remarkable results: fostering **effective learning, encouraging personal growth, and broadening learners' perspectives**. By breaking down complex subjects and making them accessible, we empower learners to gain a deeper understanding of crucial areas in their studies.

We strongly encourage schools to **partner with LiMSA** and take advantage of these comprehensive lessons. Together, we can help learners overcome academic challenges and reach their full potential.
